

## ENGINEERING SERVICES

- **Design and Styling**

Saleen has the in-house capability to create CAD-based styling studies for full vehicles, interior and exterior or for separate components. We also have full capability for mechanical design. Saleen has workstations employing the latest Unigraphics software, and we additionally use Solidworks and Autocad. We have full surface capability with Rhino and Unigraphics software.

- **Engine Design and Development**

Saleen has the ability to design complete engines, systems, or separate components. We also can package engine systems in existing engine compartments. In addition to the engine packages for Saleen-branded products, we have developed engine packages for other OE manufacturers.

- **Vehicle Development**

Saleen has the capability to support many types of vehicle development activities. Saleen has support vehicles ranging from 5<sup>th</sup> wheel trailers to full tractor-trailer rigs capable of transporting up to four cars in a single enclosed rig. Our location makes us ideal for supporting hot trips and high-altitude trips.

- **Fabrication and Machining**

Saleen has prototype fabrication and machining capability. We work with outside suppliers for CNC and stereolithography capability. Using our 3D CAD/CAM abilities, Saleen can take parts or projects from Concept to Prototype to Production in very short periods of time.

- **Composite**

Saleen has the ability to create body parts in TPO (Thermo-Plastic Olefin), urethane, fiberglass, carbon fiber, or plastic. For low-volume urethane manufacturing, Saleen has developed an exceptional process that is low in piece cost and investment cost. Designs can be created directly in CAD or modeled in clay or foam at our model shop. To control costs Saleen also manufactures the molds using our unique process.

Saleen currently manufactures parts for other OE manufacturers and other companies for aftermarket parts.

- **Paint**

Saleen has a paint facility for painting all the body parts that are manufactured for Saleen branded products. Paint match to Ford colors for fascias, wings and other components is reliably achieved.

- **Complete Service**

Saleen has the experience and ability to design, develop and manufacture any vehicle system or component.
